GUARDIAN^{FB}

Fluid Barrier Broadloom Carpet

GUARDIAN - FB Broadloom Carpet

Guardian FB System Features

Guardian prevents spillages from penetrating the floorcovering and entering the substrate, which can cause permanent damage and emit lasting odours.

Guardian is available on a wide range of carpet styles, textures, colours and fibre weights.

Guardian products incorporate Ultrel® Solution Dyed Nylon fibre which provides a more easily cleanable textile. Stronger cleaning agents can be used without damaging the carpet fibre.

Guardian products are full broadloom, 3.66 metres wide. This minimises the number of joins used in an installation and reduces the potential fluid leakage factor. Less joins also reduce trip hazards, installation wastage, and the associated 'hiding places' for microbes all of which are more prevalent in carpet tiles and narrower width floor coverings installations.

Guardian provides a 'flexibility without cracking' characteristic, like that found in conventional carpet. This enables stairs and other feature items to be easily carpeted.

Guardian FB Anti-Microbial Protection

Whilst Ultrel® Solution Dyed Nylon fibre does not itself create an environment for micro-organisms to flourish, Body fluid and/or food spillages can.

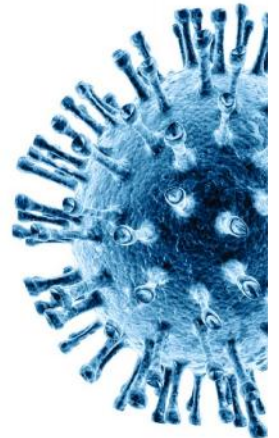

The Guardian backing system provides added protection by incorporating anti-microbial compounds that will last the life of the carpet and inhibit the growth of a large range of moulds, mildews and bacteria.

Guardian FB Environmental Footprint

Guardian products incorporate Ultrel® Solution Dyed Nylon fibre. The use of this fibre is an environmentally responsible option since the solution dyeing method conserves energy and uses up to 90% less water than conventional dyeing processes.

Guardian products include up to 30% pre-consumer recycled content in the face fibre.

Guardian contains no PVC, Fibreglass or Bitumen.

Spills soak through ordinary carpet onto subfloor

Guardian FB keeps spills on top

Comprehensive Testing & Warranty Package

Tested to AS/ISO 9239-1
Reaction to Fire Tests for Floor Coverings
*Suitable for ALL building classifications,
including Class 9A (patient care areas).*

Tested to AWTA: HHC-3-2003
Determination of Drag Resistance of a Textile Floorcovering
Tested to AWTA: HHC-4-2003
Impedance of Floorcovering to Wheeled Traffic
*Low friction resistance - Complies with OH&S
requirements for push/pull.*

Tested to AWTA: HHC-6-1998
Resistance to cracking of a Textile Floorcovering

Warranties

Guardian products are covered by comprehensive warranties,
including:

- Abrasive Wear
 - StainFree
 - ColourFast
 - Anti-Shock
-

Australian Made

Northstate carpets are wholly made in Australia, ensuring strict
Quality Assurance from carpet tufting through to application of
the proprietary Guardian backing system.

Guardian products are suitable for Direct-Stick installations only.

Refer to your local Northstate representative for more details.
